HERMES

Matt Olan, William Mak, et al.

The Story

- started one year ago

- NSA data intrusions

- more reliable, and sustainable

- world's biggest hack-a-thon
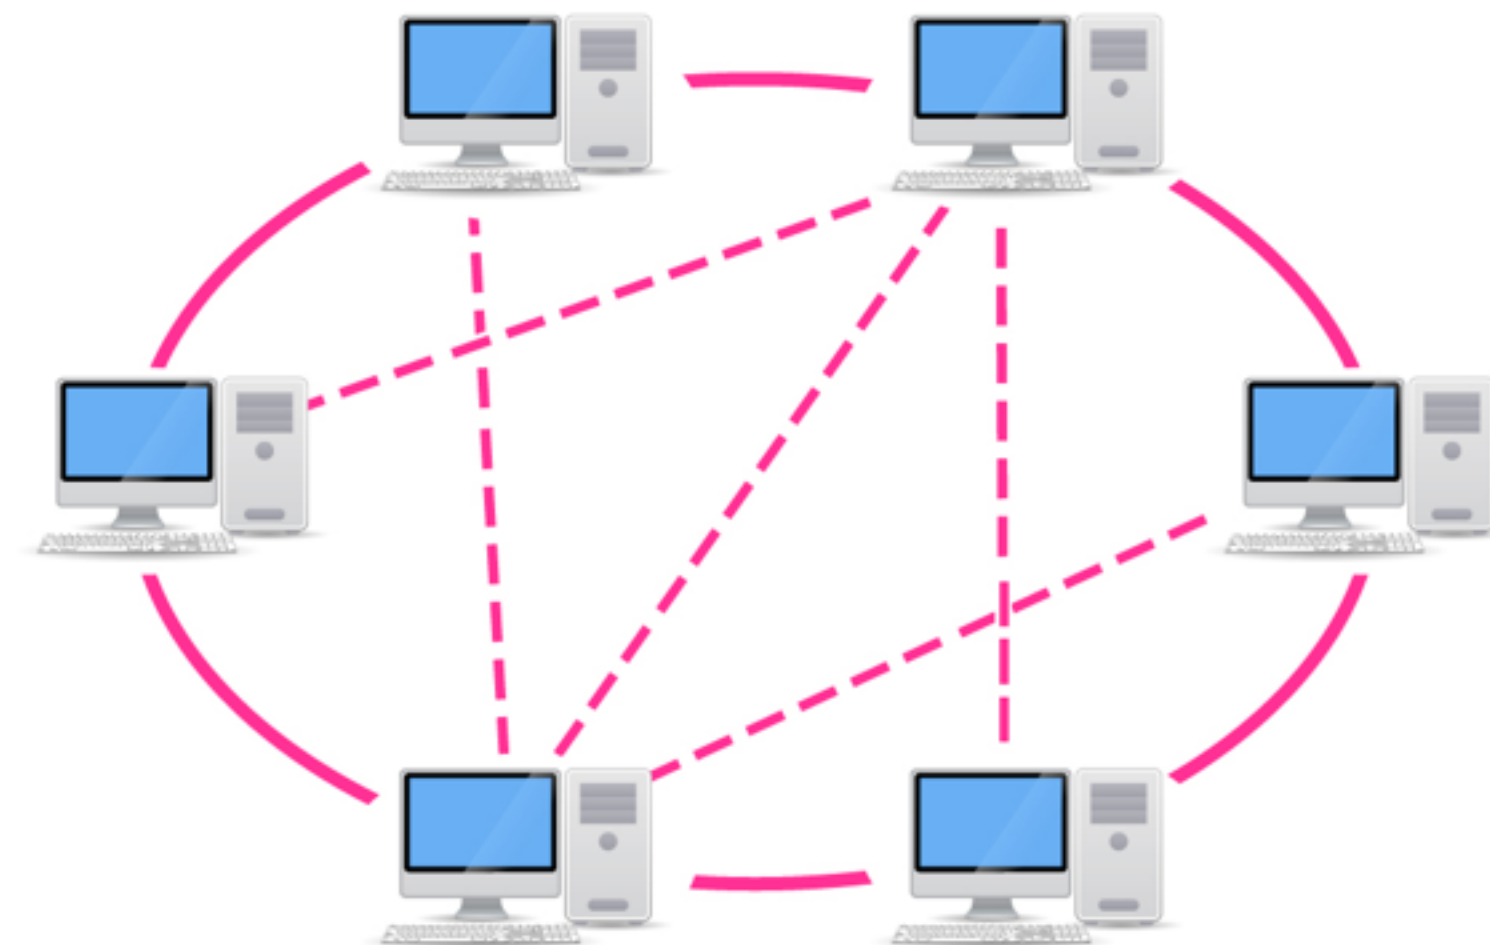

The Problem

- current "cloud" storage systems…

  - rely on data centres

  - not anonymous

  - not regenerative

  - subject to government rulings

Our Solution

- Dropbox + BitTorrent = <3

- backup as usual

- military grade encryption

- sent all around the world

- no governing body

Applications

- personal data storage

- commercial data centre replacement

- moving confidential information across boarders

Take Part

- written in Google Go

- open source and free
